

EXPERIENCE

Gray Marrow - Gurugram, Haryana

Software Developer

Jan 2025 – Present

- Developed low-latency trading dashboards using **React.js** and **modern JavaScript** on Linux systems, improving interaction speeds by **35%** and responsiveness during market spikes by **25%**.
- Worked in Agile sprints with cross-functional teams to build real-time data visualization components with reusable design patterns, enhancing execution speed and a 25% boost in system responsiveness during peak market conditions.
- Refactored UI enhancements using **HTML5, CSS3, JSX**, achieving a **30% improvement in page load speed** and **20% increase in internal tool engagement**.
- Optimized low-latency trading system components using **C++** on Linux, reducing processing latency by up to 35% through efficient multithreading and memory management in a high-frequency trading environment.

Solytics Partners - Pune, Maharashtra

Full Stack Developer

Apr 2023 – Dec 2024

- Revamped legacy code with **React, Redux, JavaScript, and React Table**, leading to a 40% performance boost and reduced page load times by 2 seconds to improve web application performance.
- Built and maintained a complex full-stack application with **React.js** and **Node.js**, resulting in a 50% increase in monthly active users and a 20% reduction in customer support tickets within six months.
- Gained proficiency in modern frontend frameworks and libraries such as **React, Axios, Material-UI 5, Formik, Yup, React Router DOM, etc.**, achieving a 40% decrease in bounce rate and a 30% increase in user engagement metrics.
- Architected and optimized **RESTful APIs** using **Django**, reducing server response time by 40% and boosting overall application performance, resulting in a 25% increase in user satisfaction.

EDUCATION

Bachelor of Engineering

Army Institute of Technology, Pune (SPPU)

Jun 2018 - Jun 2022

CGPA: 7.9

PERSONAL PROJECTS

Web-Based Facial Authentication (Liveness Detection)

- Led a cross-functional team to implement Web Based Facial Authentication (Liveness Detection) technology, reducing unauthorized access incidents by 40% and enhancing security compliance by 25% utilizing Chrome, **Python, React.js, and Bootstrap technologies**.
- Integrated Live detection methods, increasing security posture by 60% and thwarting 90% of attempted cyber attacks, safeguarding critical company assets and reducing security incident response time by 40%.

Realtime Chat App

- A React-based web application which allows users to chat in real time. Implemented React.js framework to revamp the front-end design, enhanced scalability for seamless user interactions by 20% and a 25% boost in conversion rates.
- Leveraged Firebase backend to enhance data storage and retrieval, reducing loading times by 50% and improving overall user experience. Integrated Firebase Authentication SDK to streamline user authentication processes, resulting in a 40% reduction in login time and enhancing user experience.

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript (ES6+), HTML5, CSS3, Java

Frontend: React.js, Redux, React Router, JSX, Material-UI, Bootstrap.

Backend: Django, Django REST Framework, Node.js

Tools: Git, GitHub, AWS, Postman, VS Code, Webpack, Jenkins

Dev Practices: Agile, CI/CD, Code Reviews, Unit Testing

Cloud/Databases: MongoDB, Firebase, Relational Database (MySQL)

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database Management System, and Software Engineering.

Areas of Interest: Web Design and Development, Cloud Security, Debugging.
