EXPERIENCE

Turing

Multimodal Evaluation Specialist

May 2026 – Present

Remote (Freelance)

- Labeled audio-visual clips for coherence, grounded captioning, and spatial-reasoning checks on custom AI evaluation platforms
- Verified and corrected transcripts against audio, reducing entity and timing errors by **35%** before training ingest

Handshake AI

AI Evaluation Specialist

Mar. 2026 – Sep. 2026

Remote (Freelance)

- Authored gold-standard software-engineering evaluation tasks so LLM coding agents could be scored consistently
- Calibrated oracle vs no-op baselines and quality-control checks, raising pass/fail reliability of agent runs by **25%**

Outlier

LLM Trainer

Aug. 2025 – Aug. 2026

Remote (Freelance)

- Ranked paired model outputs for **RLHF** preference data; factuality and plausibility audits lifted rater agreement by **20%**
- Wrote adversarial prompts to surface hallucinations and instruction-following failures across STEM and finance prompts

Gray Marrow

Software Developer

Jan. 2025 – Jul. 2026

New Delhi, India

- Delivered low-latency trading dashboards in **React.js** and **JavaScript** on **Linux**, improving interaction speed by **35%** and peak-load responsiveness by **25%** during market spikes
- Engineered **Python (Pandas, NumPy)** market-data pipelines that resample tick streams into OHLCV candles (1s/1m/5m) for real-time charting and strategy indicators
- Optimized **C++** trading components on **Linux** with multithreading and memory tuning, reducing processing latency by up to **35%** in high-frequency paths
- Extended legacy **C++** OMS with NSE equity and BSE FIX, NFCast L2, TBT ingest, TradingView HTTP orders, PreRMS, and **GitHub Actions** CI/CD
- Evaluated GenAI copilot drafts for OMS docs with prompt engineering and RLHF-style ranking, cutting unsafe suggestions by **30%**

Solytics Partners

Full Stack Developer

Apr. 2023 – Dec. 2024

Pune, India

- Modernized legacy frontend with **React**, **Redux**, and **React Table**, boosting performance by **40%** and cutting page load by **2 seconds**
- Shipped a production **React.js** + **Node.js** application that grew monthly active users by **50%** and reduced support tickets by **20%** within 6 months
- Designed **Django REST** APIs that cut server response time by **40%**; launched **Material-UI/Formik/Yup** flows that lowered bounce rate by **40%**
- Added **PostgreSQL**-backed reporting with automated API tests, and audited LLM-drafted QA notes on AML reports for factuality

PROJECTS

SentinelOps | Agentic SRE Console | Live | GitHub

- Architected a multi-agent incident pipeline (**Angular**, **FastAPI**, **MCP**, **SSE**) with human-in-the-loop remediation, improving AI action auditability by **40%**
- Enforced token/budget limits and durable run state on **Cloudflare Pages**, cutting unbounded agent-loop overruns and raising demo reliability by **50%**

Trading Engine Bridge | TradingView to OMS | GitHub

- Developed a **C++17** webhook bridge (**libmicrohttpd**, **Postgres**, binary **TCP**) mapping TradingView alerts to OMS orders, reducing middleware latency by **35%**
- Implemented token-gated webhooks and NSE/BSE contract resolution with structured fill logging, improving routing correctness by **30%**

EDUCATION

Army Institute of Technology, Pune (SPPU)

Jun. 2018 – Jun. 2022

Bachelor of Engineering | CGPA 7.9

Pune, India

- Coursework: Data Structures & Algorithms, Operating Systems, OOP, DBMS, Software Engineering

SKILLS

Languages: C/C++, Python, JavaScript (ES6+), TypeScript, Java, HTML5, CSS3

Frontend: React.js, Next.js, Redux, Angular, Material-UI, Bootstrap, React Router

Backend: Node.js, Django REST, FastAPI, REST APIs, WebSockets, PostgreSQL

AI & Systems: Prompt Engineering, RLHF, Model Evaluation, Linux, C++

Tools: MongoDB, MySQL, Firebase, Pandas, NumPy, AWS, Git, GitHub Actions, Jenkins, CI/CD, Cloudflare
